According to this theory, the building could not support its own weight. Accidents and Emergencies The Bobs have been involved in many accidents. Two cases have been reported to the Occupational

Safety and Health Administration. In 1985, a man named Richard Grishman was working on a ladder about forty feet high in the center of the second floor of the Bobs. He called for help from the crew working in the same area. His fellow workers were going around the building the opposite way. Instead of trying to direct his fellow workers, Grishman tried to run to the Bobs but fell when the steel sheeting covering the floor buckled under his weight and ripped up. He fell about 20 feet and landed on his back. A second fall resulted in a head injury. When he was sent to the emergency room, his blood alcohol level was .35. Grishman was sentenced to a year of probation and fined \$1,000 for a misdemeanor. The other accident occurred in 1996. Two members of a construction crew fell through a hole in a wood-framed fence around the Bobs. A local doctor was called to the scene. The man was treated at Westmont Hospital in Des Plaines and later released. An OSHA report was issued. Legacy After her retirement, Ms. Bobs remained a pivotal figure in the community.
