For backup files saved locally - also not the only way to back up Automatically back up everything in Wunderlist, Can back up also to your Dropbox account Supports custom schedule intervals Helps to create backups with trusted software Start creating backups on the go Manage your backup files right on the device Backup files as well from a USB stick The application is absolutely free to try, you can fully try the app for the duration of 30 days Note: This application has been retired and is no longer actively supported.

However, you can still download it from Softpedia and use it as long as you like. This post was originally published on March 01, 2018. More posts like this one by using search widget for the Android app storeQ: `SliderSet.GetValue()` giving very high values

---

I am trying to create a simple application that can set and get a value and change the color of an icon. The value of SliderSet1 is changing correctly, but the value of my Label is changing 2,000,000,000.

```
public partial class Form1 : Form { public Form1() { InitializeComponent(); } private void button1_Click(object sender, EventArgs e) { if (SliderSet1.Value == 5) { label1.ForeColor = Color.Green; } else { label1.ForeColor = Color.Red; } } private void SliderSet1_ValueChanged(object sender, EventArgs e) { label1.ForeColor = Color.Green; } private void SliderSet2_ValueChanged(object sender, EventArgs e) { label1.ForeColor = Color.Red; } private void S1_09e8f5149f
```

Backupery For Wunderlist is an application that helps you back up data from Wunderlist. Although it's not a free tool, it doesn't make much sense to block it from your device. When you need a quick way of backing up your Wunderlist data, you'll want to try Backupery For Wunderlist. Webalizer is a PHP script that collects web-site statistics for you. It tracks visits to the web page, the search terms that users used when visiting the site and keeps track of the traffic coming to your website. It allows you to view the statistics in charts, a variety of graphs, sort data, compare visits over specified period of time etc. Webalizer Features: \*Users Statistics (visits, visits per day, visits from certain country/city, visits

---

from certain referrer, searches). \*Site Statistics (pages, pages per visit, pages per session, most visited pages, top search words). \*Site Environment Data (most popular web browser, most popular web browser version). \*Webalizer helps you in many situations where it is not easy to look into logs of web server. For example, there is a great need to generate reports about web traffic to your site. Webalizer gives easy way to that. Other great uses of the program are:

- \*Detecting changes in your web server as stats are provided to you in real time.
- \*Analyzing trends in your content.
- \*Understanding your visitors.
- \*Monitoring of any script activity.
- \*Analyzing file size traffic to your website.
- \*Detecting problems with a web server, such as slow connection.

To learn more about Webalizer, read its help
