Ease of use software for quick and effective recovery of deleted or lost office documents without affecting the documents integrity or the original file format. Recovers lost or deleted documents from deleted backups or folders (including entire disks and partitions) using an auto file recovery engine. Scan more than one drive at a time or all the drives on the system. Recovers Office documents from Windows operating systems (NT, 98, 2000,

ME, XP, Vista, 7) from FAT and NTFS file systems. Recover more than one document at a time and look through all recovered documents in a tree view. Filters recovered documents by file type or text string (even PDF, MS Publisher, and other special formats). The application does not recover documents from any type of partitions like FAT16/32, FAT12, FAT16, FAT32, or NTFS. Recovery is not supported for RAID0 or RAID1 volumes. The recovery engine for all of the file

formats supported by MS Office documents, including text, rich text, and xml. Extract text/image from recovered documents into a variety of formats, including PDF, TIFF, RTF, HTML, TXT, JPEG, PNG, BMP, GIF, and JPEG. The application gives you the ability to move recovered documents to other partitions, so that you can read and reuse them more easily, or move them to any folder on the system. The application can recover multiple documents from a single restore, with different file names. It

is a multi-threaded application that allows you to scan up to 16 active drives at a time, with up to 16 concurrent threads. A virtual memory manager speeds up the recovery of large or many files, and is especially effective on large systems. Sleek and clean user interface - minimal keyboard controls help you access the most frequently used functions. Your digital media can be restored to your computer more easily than you would ever believe. Support for most major file systems, including

FAT, NTFS, NTFS-3G, FAT32, VFAT, FAT16, FAT12, and HFS. The application does not recognize the recovery engine for RAID volumes and does not support mounted files. It is a Windows 98, 2000, NT, XP, Vista, or later operating system. Runs in a Windows system environment. DiskInternals Word Recovery Screenshot: Buy Lightshot: Buy BitDefender Social Monitoring:
