In these files, I need to extract device/name/user information. I want to send it to "Windows bootloader v2 2.2.rar". I tried: set /A "C:\Program Files\Windows Genuine Advantage\Logs\lega-cga.dat" goto LoaderWindow but it doesn't work (I can't find the cga-cga.dat file). I want the uploader to download the files and run them. On Linux, I would use sudo, but I want to use Windows.
