Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to encode videos on the breeze, without having to go through installation steps. Kirara Encoder Portable boasts a clean and straightforward layout that allows you to upload files into the working environment using the built-in browse button or "drag and drop" operations. It offers support for batch processing, which means you can add multiple items and process them at the same time. The tool gives you the possibility to select the desired output format or choose from various preset profiles which are built specifically for helping you encode videos to formats compatible with Apple devices, mobile phones, or game consoles. When it comes to configuring the video parameters, you are allowed to select the codec, bitrate, and frame rate, maintain the original frame rate, as well as pick the image size and aspect. The audio parameters can be tweaked in terms of codec, bitrate, channel, sample rate, and audio filters. Other powerful features worth meaning enable you to set up the video filters by altering the hue, saturation, gamma, contrast, and brightness, flip or rotate clips to different angles, apply deinterlacing and sharpening options, remove camera shake effects, and

adjust other filters as well. The utility lets you tweak the subtitles parameters in terms of character encoding, font, size, border style, margins, color/transparency, alignment, and scale. What's more, you can specify a filename prefix, set the file size limit, carry out the encoding process based on an estimated file size (the video bitrate is changed), as well as remove metadata and chapters. Last but not least, you can check the log for detailed information about the encoding task, view details about the conversion process (e.g. file size, elapsed and remaining time), set priorities, and analyze the tool performance with the use of a graph. During our testing we have noticed that the app carries out the conversion operation pretty quickly 09e8f5149f
