In order to enable Message Sensitivity, simply add the plugin to the navigation bar of your Microsoft Outlook. You'll see the new menu item called "Message Sensitivity" with 4 options: Normal, Private, Personal, and Confidential. When you click on the desired button, the Message Sensitivity dialog will open. There you can set the message sensitivity level you wish to use. Normal - Displays the message without any

special treatment. Private - Private messages will be displayed in your default Private Folder. Personal - Messages that are marked as personal will be displayed in your Private folder. Confidential - Messages that are marked confidential will be displayed in your default Confidential Folder. Message Sensitivity is a plugin for Microsoft Outlook 2003-2007 that allows changing sensitivity of messages with just one click. With this plugin now you can mark your e-mail messages as confidential

very fast and simple. What this plugin do? It adds a button to ribbon menu bar that allows changing message sensitivity with single click. Message sensitivity in Outlook 2007 is an advice to message recipient about how to treat message content. There are 4 levels of message sensitivity: Normal, Private, Personal and Confidential. Usually this can be adjusted via message properties and you need around 8 clicks to do so. With the help of this small plugin you can quickly set the

message sensitivity with a single click. Outlook 2007 Message Sensitivity Plugin Download . Screenshot: . Outlook 2007 Message Sensitivity Plugin Screenshot . Outlook 2007 Message Sensitivity Plugin Introduction Greetings! This plugin is a part of j-fusion Outlook 2007 Item Sensitivity Plugin for Windows. Outlook 2007 Item Sensitivity Plugin for Windows lets you to easily set up 4 levels of item sensitivity. Outlook 2007 Item Sensitivity Plugin for Windows can

be used in Personal Folders, Deleted Items or Archived Items. It will display the item in the folder with 4 levels of item sensitivity: Normal, Personal, Private and Confidential. You can get more information about this plugin on the website. . Screenshot: . Outlook 2007 Item Sensitivity Plugin Screenshot . Outlook 2007 Item Sensitivity Plugin Features: The item sensitivity feature provides an easy-to-use interface for managing sensitive items in your mailbox. You will see the message

sensitivity level changeable with a single click. You can change the item sensitivity in a

Outlook 2007 Message Sensitivity Plugin Keygen Free

1. Select the messages that you want to customize.
2. Press Del-F6. Message sensitivity will be set to Normal.
3. Press Del-F7. Message sensitivity will be set to Private.
4. Press Del-F8. Message sensitivity will be set to Personal.
5. Press Del-F9. Message sensitivity will be set to Confidential. Include hotkeys

F6, F7, F8 and F9. A message is sensitive if a private or confidential. This means that a recipient knows that a message came from you. If the message was send through a server the recipient won't be able to see your address. If the recipient (or someone else) knows your real address you can send a message by setting message sensitivity to confidential.

Uninstall: 1. Uninstall the Message Sensitivity from the following location: For Outlook 2003:
C:\Program Files\Microsoft

Office\Office12\OUTLOOK.EXE

For Outlook 2007: C:\Program
Files\Microsoft

Office\Office12\OUTLOOK.EXE

2. Remove the installer file from
the following location: For Outlook

2003: C:\Program Files\Microsoft

Office\Office12\MOMSEN.DLL

For Outlook 2007: C:\Program
Files\Microsoft

Office\Office12\MOMSEN.DLL

NOTE: This will remove your
hotkey macro. For support please
make a copy of the log file

(Message Sensitivity.log) and send

it to us. Feedback on Message Sensitivity is very important to us. Please provide us with feedback on Message Sensitivity. Comment posted by Andre Oierge (Nov 9, 2011 at 7:25 AM) Hello! I have installed this software, but for some reason I cannot change the setting for any email accounts. Please help me!! I do not know how to add other email accounts to the settings menu. I cannot find any documentation on the settings menu. Thank you! Comment posted by Charlie (Aug 14, 2011 at

10:37 AM) When i try and un-install, the uninstaller doesn't seem to work. I don't receive any errors, but when I try to do a'repair install' option, it doesn't work either. I don't get any errors when I try to do the repair install. It just does nothing. Comment posted by 77a5ca646e

===== This plugin changes sensitivity of your messages in one click. You can set sensitivity of all messages at once and you can also set and set sensitivity of one message. In addition this plugin offers you to mark messages as trusted, that means that message recipient should receive message even without warning. All messages are sensitive by default. In this way you can set sensitivity for all your messages. In this plugin

are 2 options you can choose: 1) to set sensitivity for all messages at once. 2) to set and set sensitivity for one message. With help of this plugin you can set default sensitivity for all messages in your mailbox. You can set and set sensitivity on a specific message via this plugin. The message recipient can be set into level 2, 3 or 4. As result of this plugin your e-mail looks more professional and you can forget about most annoying question from clients on how to treat your confidential

messages. In addition this plugin offers you to mark messages as trusted, that means that message recipient should receive message even without warning. Files in this package: -----
