AutoCAD, like other CAD programs, allows users to design, create, modify and document three-dimensional (3D) models of structures (such as buildings, ships, aircraft, bridges, dams and more). AutoCAD is used to design and create almost anything a builder or architect would ever use. AutoCAD is used for architectural design, electrical and mechanical engineering, automotive design, the architecture, civil engineering, landscape architecture and mechanical drafting. In this article we will see how to install and open AutoCAD 2018. AutoCAD Classic For AutoCAD Classic, the file you want to open is called a DWG or DXF. A DWG is a type of file created by some older versions of AutoCAD. DXF is the file format used for AutoCAD 2017 and later. AutoCAD 2018 supports native file format DXF as well. I do think, for the most part, that the Colorado state park system does a good job of managing the State Parks. However, I have visited some parks in the west that were really a pain in the butt. I do recommend you visit some of the State Parks in the southwest and especially the south west. There are some really nice areas to camp, hike, view wildlife, water-fall, and generally enjoy a good time. There are a lot of interesting animals in Colorado State Parks. I always enjoy seeing some kind of critter in the morning when I wake up. They don't have a "kill the bear" program, so they don't send up any hounds. When I was visiting Colorado in 1984, I spotted a bear. The bear was a young bear with a lot of black fur. It was in a state park and I think it was in the lower part of the park. I will see if I can find the exact location. However, I will tell you, I really wanted to get out of the car and get some pictures. I really wanted to see the bear up close. Well, I stopped the car and got out, and the bear just did a little jump and crossed the road. The car would have been easy to stop, but I had to try. I never did get to see the bear, but I did get to see the paws of the bear. Oh yeah, and the bear wasn't in the lower part of the park, it was about 500 yards up the trail.
