Many applications let you capture and store a copy of text you enter into the clipboard. By selecting that text in the future, you don't have to copy and paste. This is convenient when you want to copy a phrase from a web page, or a website address, into a document. Capture more than 10 items There are plenty of applications that can store more than ten items in the clipboard, allowing you to select a pasted item and a clipboard history. On Windows 7, there is a built-in clipboard manager that stores the last five items copied or cut. This may seem to be a lot, but it's more than enough for most tasks. Decacopy Discussion: Decacopy is a tool that allows you to store a copy of text in the clipboard. This way, you can paste a copy of the text in the clipboard at any time without having to click the copy button in the taskbar and wait for it to complete. The only downside is that it can only remember the last 10 items, but it doesn't have a rich set of options. [caption id="attachment_137" align="alignleft" width="560"] Decacopy/caption] Decacopy is not a new application. It was first released in October 2004 and was later updated in December 2013, December 2014, May 2014 and October 2014. Even though you can save as many items in the clipboard as you want, there is a limit to how many items can be added to the clipboard. When you paste an item, you will be asked if you want to add it to the clipboard. If you say yes, it will be added to the clipboard. This is useful to know. If you want to paste the latest clipboard item and not the one that was last copied, you will have to copy and paste the latest item a second time. Question: How can I restore the Windows clipboard to its default state and remove all previously stored items? Solution: First, run the default Windows 10 restore app. From the Windows start menu search bar, type restore and open the file. After opening the file, open the Restore Programs dialog box and select your preferred restore point. Optionally, if you want to be very careful and restore all the default values, select the Complete option. Question: How do I restore my clipboard to its default

What's New In Decacopy?

By default, when you click on the calendar in your Windows 10 taskbar, you are taken to the Windows 10 mobile calendar app. This is a useful app, as it gives you the ability to add appointments and set reminders. It is not, however, the most visually attractive app. And there are probably reasons why Microsoft has not yet improved the Windows 10 mobile calendar app. First, it is not the most recent app, which means it does not support all the Windows 10 features. Second, it is a small app and it has limited features. Nevertheless, it is a useful app and it can be a great help in organizing your life. The Windows 10 mobile calendar app has a calendar view, in which you can add, remove, or edit events and appointments. You can even set notifications and reminders, which are a great help in keeping you focused on what is important. To add an event or appointment, simply select the calendar, the month and the date from which you want to start. You can choose an existing event or add a new one. The last option takes the form of a calendar event, which you can add in seconds. You can navigate to a specific day by clicking on the calendar or month. A similar menu is available to edit the selected event. You can change its color, the text size and its font. There are many other options and you can find them by clicking on the gear icon. There are two ways in which you can find the Windows 10 mobile calendar app. You can search for it by typing in the Start menu or you can access it by pressing CTRL-S. In case you are new to the Windows 10 mobile calendar app, you will need to add your Microsoft account to it. You can do so easily by clicking on the "Get started" button, which is located next to the calendar. Description: To achieve a consistent look on your Windows 10 PC, it is important to use the same theme across all the programs you use. Windows 10 comes with a built-in theme engine that lets you quickly and easily apply different visual styles to your desktop. But the problem is that the current UI guidelines and Microsoft Store apps, many of which have been designed by third-party developers, do not follow these guidelines. There are two ways to get the most out of the Windows 10 theme engine: the first one involves manually applying new theme for specific Windows apps, and the second one is to download one of the many free Windows themes from the Microsoft Store. But, there is another solution, which involves creating your own theme for Windows 10. Create your own Windows 10 theme Let's start by creating a new theme.
