IAEA-TECDOC-1434. application expired 8500 tecdocQ: Speed issues when using Puppeteer with Selenium So I'm finding with this script that I can get it to scrape through 4 pages of my website, with some minor timing issues. If I use it to scrape one page at a time, it works fine. But what I'd like to do is pull all 4 pages at once and store them. I did find a way to do this by adding the parameter:

```
page.property('screenshot').then((screenshot) => { But I seem to be running into speed issues, and I just don't know enough about WebDriver. The same script works fine without any issues on PhantomJS but it seems to take ages for this to run with Puppeteer... If I try to scrape 4 pages at once, it will try to scrape the 1st and then the 3rd and 4th so it will give me 4x the results that one page would. Here is the full code: const puppeteer = require('puppeteer'); (async() => { const browser = await puppeteer.launch({headless: false}); const page = await browser.newPage(); await page.goto('', {waitUntil: 'load'}); // Wait until text loaded await page.goto('', {waitUntil: 'load'}); const url = await page.evaluate(() => { e79caf774b
