A 34-year-old woman was readmitted to hospital with a 15-day history of generalized abdominal pain, nausea and vomiting. She was found to have a serum creatinine concentration of 434 μmol/l. There was no history of recent diarrhoea, and stool microscopy showed no ova or parasites. An X-ray pelvis suggested bilateral nephrocalcinosis. Her uric acid and creatinine concentrations were elevated and she was found to have bilateral renal calculi. Her uric acid level fell dramatically after the institution of allopurinol. The laboratory features indicated a diagnosis of Houtman's syndrome. The pathogenesis of Houtman's syndrome is discussed and allopurinol therapy is briefly reviewed.US Navy to start releasing service members' info Leah Millis | USA TODAY SAN DIEGO — The Defense Department will soon begin releasing the names of service members who commit suicide, a first for the U.S. military as it grapples with a rising number of ca3bfb1094

Features a new interface and new animation effects for sketching on Windows Drawing Center with 3D tools: Now automatically imports elevation information and 3D effects to your drawings. Get quick visual feedback on elevation changes. (video: 3:15 min.) Design exploration: Simplified feature line tool and tool palette. (video: 3:15 min.) Improvements to drawing packages: Particle surface enhancements to pressure applied to surfaces (video: 3:15 min.) Metallic surface enhancements (video: 3:15 min.) Improved support for extruding and rotating objects and all extrusion and rotating effects on surfaces Extrude and rotate by incremental values: Increase or decrease the rotation or extrusion of an object by one increment Perform texture fills and subtractive surfaces by changing the mask or attributes of a previously created texture fill Refine parts or work with existing tools to create a new part or change the attributes of existing parts: "Take the top of this part off" Create a new part from an existing drawing: "Create Part" Parts are now stored in the drawings they belong to. This is especially useful for multi-part drawings. You can create a new part from any existing part of the drawing The parts are now contained in a table in the drawing Export and import the part to another part library Save as another drawing part library: Each component of a part is now saved as a separate drawing part library The part library is now saved in the workset associated with the part. Join and export a subpart to a new part library: Existing parts can now be joined, even if there is no connection between the two drawings. A new drawing part can then be created from the new part library. Create an exported drawing part from an existing part library Add a multipart drawing library to another drawing: This is especially useful when reusing parts or parts libraries that you created in another drawing. Bilateral symmetry, mirroring and flipping Draw objects with bilateral symmetry, mirrored and rotated objects Create new objects based on existing objects: Geometry and shared dimensions are created for new objects based on existing objects. All the parts of a new object are
