Version History AutoCAD was originally released with a Windows-only operating system. Starting with AutoCAD LT, AutoCAD was available as a cross-platform application for the Macintosh and Linux operating systems. A Windows version of AutoCAD LT was released in June 2004. In 2012, AutoCAD started shipping for macOS through the Mac App Store. The first beta of AutoCAD 2017 was released in July 2012. The first release candidate of AutoCAD 2017 was released in August 2013. The first release of AutoCAD 2017 was available for download in November 2013. AutoCAD 2016 was released in December 2015. AutoCAD 2019 was released in December 2017. AutoCAD 2020 was released in September 2018. AutoCAD 2016 was released on October 22, 2015, and was the first major new release of AutoCAD since 2009. AutoCAD 2016 introduced the first major feature in AutoCAD since its release as AutoCAD 2009, the ability to use an Apple iPad as a graphics tablet. Other new features included improved 3D and 2D modeling capabilities, the ability to view, edit, and generate design assemblies with 2D drawings, and improved 2D and 3D drafting and editing. A major new

addition to AutoCAD 2016 was the introduction of the Drafting and Annotation Services (DAS) technology, which allows the creation of collaborative BIM (Building Information Modeling) documents. The DAS technology could potentially be expanded to allow other types of collaborative documents to be developed, such as collaborative presentation documents. New features of AutoCAD 2016 were also available for the Windows and macOS operating systems. In October 2013, Autodesk released a new version of AutoCAD 2016 for the Mac OS X operating system. This version featured many new features, including the ability to place an offset shape on a solid surface. In addition, the application was fully compatible with the iOS operating system, allowing iOS devices to be used as graphic tablets for users who do not have a working Mac computer. AutoCAD 2017.1 was released in December 2014 and features include: a redesigned user interface, new features in the ribbon design, the ability to use an Apple iPad as a graphics tablet, improved 2D and 3D drafting and editing, and a new feature called AutoCAD Fillet. AutoCAD 2017.1 was released for the macOS and Windows operating systems.

Expression of insulin receptor genes in rat beta cells. Insulin receptors are transmembrane proteins that mediate the biological actions of insulin. The expression of insulin receptor genes (IR-A and IR-B) was examined in rat islet beta cells, using reverse transcription polymerase chain reaction (RT-PCR). IR-A mRNA was detected in islet cell suspensions but not in islet cell homogenates. RT-PCR analysis of insulin receptor mRNA in purified beta cells showed a single band of expected size for IR-A and IR-B mRNA. Southern blot analysis showed IR-A gene to be a single copy gene. IR-A mRNA was also detectable in the brain, spleen, kidney and pituitary. These data suggest that insulin receptor genes are differentially expressed in the islet beta cells and other tissues and may play a role in the regulation of glucose metabolism.

dropped the music video for her newly released single "Sitting in Limbo," which could prove to be a hint of what fans can expect when her debut album—a long-overdue follow-up to her 2012 EP Guppy—drops this fall. Decker teamed up with filmmaker Dylan Gladden to give fans a little sneak peek into the album, which will be available on iTunes, Spotify, and all other major music platforms. Directed by Gladden, the video is said to be a collage of videos from previous eras, featuring scenes from the 21st century. "This is a song that I've been playing live for a long time," Decker says of the song in an interview with Billboard. "It feels so nostalgic and old-fashioned, and yet it's also timeless. Dylan came on board and we came up with a whole new treatment for the video, which really gives a nod to the old and the new all at once." For the video, Decker collaborated with music producer and DJ Chris Coco, who created music for the film "Sliding Doors."
