Indian Home Affairs Minister Kiren Rijiju today said his ministry is extending all possible help to bring back a missing American tourist who was allegedly kidnapped in Nepal. A 36-year-old US citizen identified as Robin Denning went missing while on a hiking trip to the Annapurna region of Nepal, which borders India. She was last seen at the Mid-Western Ghats Regional Centre in the wee hours of Friday. "We have set up a special task force to rescue Denning," Rijiju said. He said his ministry will extend all possible help to bring her back home. The US Consulate-General in New Delhi and the US Embassy in Kathmandu are also closely monitoring the situation, Rijiju said. Earlier, Rijiju said he has "succeeded" in a meeting with the State Department which he undertook along with Home Secretary Rajiv Mehrishi on Wednesday. Rijiju said the US government has already agreed to send two helicopters to Nepal to rescue Denning. The State Department's Deputy Spokesperson said the United States is aware of the report of an American citizen who was reported missing in Nepal. "The United States Embassy in Kathmandu and the US Consulate General in Pokhara are monitoring the situation closely and are in contact with local authorities. "We have received no reports of any injuries to the individual," the State Department said. Reacting to the report, Rijiju said, "I have heard about it (kidnapping) through media. If the US Consulate General in Kathmandu had come to us earlier, we could have arranged for a pick-up from the nearest airport and send them home. But they are giving us a problem in arranging a helicopter to Nepal." He said Nepal authorities should do whatever they could to rescue Denning and rescue the US citizen. "I have asked the Nepal police to initiate the process to get her back," Rijiju said.An electrophoretic system for resolving the enzymatic hydrolysis of maltohexaose. An electrophoretic system for the resolution of maltohexaose, a branched dextran, is described. Individual maltohexaose chains are resolved on cellulose acetate electrophoresis media of varying degrees of cross-linking. Hydroly
