independent, SDL2 Compiler
and/or Linker errors I've been
working on a game for a while

now, and have had several compiling errors that have pushed me into backtracing some of the errors to how I'm using SDL2 in Visual Studio Code on Windows. The errors have been due to SDL2 compiling errors, and then linking errors. I have tested the codes with SDL2 directly, and can use it there. However, when I attempt to compile to an executable using SDL2 in

Visual Studio Code, I get: Error 1 error LNK2001: unreferenced external symbol "public: static struct SDL_SysWMEEntry ** WINAPI __cdecl SDL_WMEntry_Create(struct SDL_SysWMEEntry **)". SDL_WMEntry_Create(SDL_SysWMEEntry **) SDLWMEEntry.obj 1 I have searched for this error and the closest I found to my problem was here. However, I still didn't understand the answer.

My code in C++ is using only windows.h and SDL2.h (no other libraries). I included SDL2.lib in the linker, as suggested, and recompiled the code. The error still occurs. I'm trying to find a solution. Maybe I'm missing a setting that I need to change. Here's my compiler and linker setting in Visual Studio Code: {

Place the Autodesk license key in the "License.rtf" file.

Replace the license key in the file with the license key you received. Restart the Autocad application. 4. Mount files a.

Create a repository b. Copy the repository in the root of C:\Program Files

(x86)\Autodesk\ADT

2013\Mounts\ c. Create a new

mount group named Unzip d.
In the new mount group, add
the following paths and files
Unzip\cadFile.zip,
Unzip\rawFile.rtf,
Unzip\cadFileContent.rtf e.
Mount the mount group
Update: To find the Mount
file(s), go to File, Tools, Mount.
See Autocad Help for details.
** Note: The "unzip" is not a
separate file, it is the root of
the zip file you use. You can

find the autocad software in "C:\Program Files (x86)\Autodesk\ADT 2013\Mounts". **Note: There are limits on the number of hours that can be run at once on a machine. The maximum is 15 hours per day, 24 hours per week. The latter is the reason we're suggesting that users wait until "Credential generation time is under 20 hours, otherwise, the account

will be permanently disabled" *

* * **Note: a. As of version 2015 Autocad does not recognize the previously used license key. You need a new license key. b. It will be more convenient if you use the online account activation method. It is free and easy. c. Each online account activation method has a separate license. ** Comment: The license can also be issued by an Autodesk

distributor.

Customization and personalization: Access the power of 3D parametric design. With AutoCAD, you can create complex 3D models with dynamic feature animation and rendering. A single model can be created that contains geometry, images, lighting, and text. Use 3D commands to change the material properties of your model's visual features, or

animate the motion of a series of feature lines, for example. (video: 1:24 min.) Access the power of 3D parametric design.
