As a long-time watcher of the original series, my first reaction after watching the new trailers was "Wow this looks really good." The visuals are more or less the same as the original, but with a lot more focus on the environment and setting. Some of this change is due to the player being able to create their own character (a big change from the first game), and it shows in how they look, but a lot of the change is due to the changes in the battle system. This time, it appears there is no time limit in the battles. I'm looking forward to more gameplay demos. I know we're not supposed to put spoilers out, but since the game's story has been out for quite a while, I may as well just say that this is the best looking game in quite a while. It is funny how something as simple as a giant war hammer that drops from the sky can just destroy a previously impenetrable enemy. The developers don't appear to be afraid to utilize shock and awe when they have the perfect moment to do so. The size of the different enemy types is almost like a graphical representation of how important they are. Smaller enemies in the beginning will be slightly less difficult to kill than larger enemies. I'm enjoying the game's sense of scale and exposition, and the fact that there are no long cutscenes so far. On the subject of the mechanics, the combat is a bit like Dark Souls. I like how it combines the time limit of a traditional RPG with the limited attack possibilities of most action games. I will say that it is a bit odd that the Elden Ring cast all have their own signature weapon. I would think that they would all have the same weapon type, but at least the designers tried to give each character their own unique weapon. One interesting gameplay feature is how your equipment is distributed to you based on your performance in the story. This particular system is fairly simple, but will give even casual players a new perspective on how to play the game. I'm not too impressed with the new graphics, but I'll try to keep an open mind and see if the gameplay and system are as good as they sound. This game looks really good and the gameplay looks really fun. I am very happy to see this game coming out. I will be keeping an eye on this game. I think I'm starting to see what people who like this game are saying. The graphics in this bff6bb2d33

I've Made the Patch. All you have to do is just copy it to your game folder and run it in game. Then Play your Patched Game and Install your game. that's all!Link to Metalab:Metalab16 Wed, 26 Oct 2012 02:49:59 +0000UPDATED 17:20 UTC - Oct 26

Removed warning for French language file, copied around the problems. I am leaving it as to see if anyone is willing to break the patch. I've made it so that users with Issues will have the option to press F12 to get into the Village Editor. The password is 'Metalia' and it should feel pretty strange if the game is unpatched and you press F12.

Note that this will only help install, not patch your game, as the patch should
