Elden Ring is a fantasy action RPG developed by FromSoftware Entertainment, a Japanese studio that has already produced such well-known games as OverSoul, Shadow in the Heavens, and Shadow Heresy. The story of Elden Ring takes place in the Lands Between, a vast world that humans call "the beyond" and monsters call "the realm of the dead". There are many cultures in the Lands Between, and the events that occur there are intricately connected to these cultures. The chosen ones of the Great God Mal'Ren live in the Ancient Village. However, Mal'Ren's True Ring has been stolen by the Dark God Akama, and the descendants of the True Ring left behind, the Elden Ring, are forced to wander through the Lands Between, protecting the Ancient Village at all costs.

This is the story of the Elden Ring. The Elden Ring features a unique structure in which all of the gameplay elements (spells, items, and so on) are customized on a per-character basis. The game also has a diverse array of features, including a combination of online games in which you can choose one of three possible endings and an offline single-player story mode.

Drizzt, his elven companion, and the dwarven dwarf Kobilar rose from the water along the shore of Lake Hro'slan. I would be surprised if they had waded in further than waist-deep, but it would not have been out of the ordinary. They were still within the borders of Calimport, the dwarven nation that had been home to the three of them for several weeks. The local dwarf guards had already been dismissed, and the people around them no longer seemed perturbed, just relieved that the three had returned safely from an adventure in the north. For several days, Drizzt and Kobilar had been down by the lakeshore, quietly fishing and

communing with the water. They had picked up where they had left off several months before, fishing and talking, and they had never been separated, not once, as had become common with them in the last few years. Drizzt paused as his companion went on ahead of him, "Drizzt Do'Urden." "Kobilar?" he heard from behind him. Rage, as always, burned within him. It was a rare thing to hear the word spoken from the lips of any of his friends. He turned and said to the other dwarf, a fellow known simply as Drizzt Do'Urden, "I know what you have said." "In so many words, I did," he replied in a more reasonable tone. "But as you well know, when it comes to dealing with the drow, words alone will not be enough." The other stood beside him, appreciating his choice in words, and Drizzt dared to smile, as he pulled from his belt pouch a tiny wooden box that had been crafted especially for him by a dwarf from Clan Karuck. Inside was a metal figurine, a

miniature creature of wood, and the presence of a dark elf. "I knew you would be pleased." The tiny figure, set between the two, made more sense when the dark elf held it up. At least to one
