The story of the Lands Between begins with the words of a wise elder who spoke about a golden sun. The sun is a symbol of eternity, which is imprinted on all the lands in the Lands Between. The sun is known as “The Abyss”, and dwells in a vast, inexhaustible egg. The claws of the Abyss are pointed, spreading outward to all the lands, and its roar will consume all who stand in its way. “The One who held the Claw is the Hero, a brave and noble man who rises up from the depths of the Abyss.” “The Hero is destined to summon a glorious and legendary weapon from the far reaches of the Lands Between...” The hero must deliver the weapon, known as the Elden Ring, to the heart of the Abyss, where the Sun resides. The Elden Ring is a weapon of the power to grant victory to the heroes who wield it.

The hero, with the great power of the Elden Ring, shall travel across all the Lands Between, going through many difficulties, to stop the evil forces that threaten the lands. DISCORD FORUM For those of you who do not yet know of

With the advent of Kingdom Come: Deliverance, it's hard not to notice the aging golden age fantasy roleplaying game genre. The genre has been around for almost three decades now, since FFTRPG (freeware) and Aquanaut were first released in the 90s, and to be honest, I think it would have never become popular had it not been for the rise of indie gaming in the 2000s. While many of the games released in this genre have gotten old, there are still a handful of titles that hold up very well, and are still fun to play. The 2018 game Gods & Heroes from Snail Games is one of those games that I think transcends many genres, and I love it for that very reason. If you're still playing Final Fantasy games, then you'll find this review to be familiar. If not, then you're in for a treat. So if you're looking for an action roleplaying game that doesn't bore you to tears, then this is one of those games. In the world of Gods & Heroes, the kingdom of Brim is divided into many factions that vie for power. The main story revolves around two characters, Lebrin and Silus, who are supposedly brothers that have been sent to Brim from the other side of the world. The reason for their journey is that their uncle is a warlord, and has become corrupt. As the story progresses, we learn that this uncle once tried to assassinate the king, but ultimately failed. From the very beginning of the game, you have to make important decisions, such as choosing a class. The choices you make define how the story plays out in the long run. The classes in Gods & Heroes are what I would classify as a cross between Final Fantasy games and other RPGs. They have some things in common with Final Fantasy, like the enhanced class abilities, and weapon/armor customization, but they also have some similarities with other roleplaying games, such as the better combat progression with stat increase as the character level goes up. In Gods & Heroes, the quests you receive during the game have a story that is presented in cutscenes where the protagonists speak. To play the game however, you only need to use your in-game conversation skills to progress the story. Using your conversation skills will allow you to talk to the NPCs to receive quests, and also ask the NPCs for help when you are stuck. bff6bb2d33

- **Acquire Items in the Tavern - Acquire a wide variety of items through the equipment-upgrading system, hand-in-hand with your fellow player or barter with monsters. - Participate in barter deals or in the equipment-upgrading system, to obtain various kinds of items. * For example, you are offered the equipment-upgrading system on “Daily Boar Hunting”, and offer “a clay pot of mealworms-upgrade”. * You must deposit one or more items to ‘subscribe’ your dealer account on the server in advance, and the items are exchanged in the same interval of time. (In the case where you subscribe, go to the Defense menu and click on Defense War.) - When you find a barter partner, a red line appears between them in the V.A.T.S. (View All Status) window. - Borrow an item at any time, and pay the barter amount in the ownership window when you are in possession of the item. - Sell the items which you cannot use in the V.A.T.S. window. - If you own more than one armor, weapons, and magic, the most powerful items are displayed first in the ownership window. * You can lose the items which you obtain or lend in a battle as a result of careless play or die while playing. * The items are not strictly necessary and there is no cost to purchase. * You are also able to trade items with our stores. The value of the items in the store will be converted to the current marketplace value. - How to recommend an item to the store The community runs the Constuctioni Discussion Board, where you can post items of high grade and interest. Items are separated into applicable categories and anyone who posts an item can receive comments concerning it from the community. In addition, when you have completed the construction of the item you want to recommend, use the Comment box. * You can acquire an item with other players by giving your plus item to a desired party. - How to**

Q: How do you set up an owned private key and certificate? Now that I've successfully setup an SSL certificate for my JBoss application server, I'd like to generate a key/cert pair for use in the login script and to control who can log in and why. This is for a Java app running in Tomcat under Windows XP SP 2. Note that I'm not a Windows user or scripting nut, so I'm happy with Unix/Linux methods for generating or finding what I need. This is most easily done with openssl and openssl.exe in MS DOS. That's fine, but there are a few slight gotchas when generating a matching key/cert pair for Tomcat: openssl.exe asks for a random password, and doesn't include an option to save the key file after creating it. So how do you generate the key with password-protected options and store it? openssl.exe doesn't have much of an option to just debug the signing process, so how can I see what errors it's having? Edit: Cloning the openssl.conf from the openssl-0
