is a fabulous program
that is used by a
designer to create 3D
images or 2D
presentations. It is
known as the next
generation of 3D

modeling software
that is used.³

"proposed" things
(made up of stuff in
my head) 1. a
"guns/obama" thread.
I need a place to put
all those thoughts I
have about guns and
Obama... I'm too tired
to think about it
tonight. 2. a "bugs"
thread I need a place
to put all those
thoughts I have about
all the politicians,
especially the

republican incumbent.
They are all a bunch of
liars (the left used to
call them
"scumbags"... I can't
remember what they
call them now)... so is
there anywhere in the
forum where I can blog
about all of my views
on them? 3. a
"religion" thread. I
need a place to put all
those thoughts I have
about religion in
general. I want to
know more about

Judaism, but, in this day and age, I'm not sure which site I should go to (there's too many...I can't figure out which of them would be the best...any thoughts?). It'll help if I can post some about "stuff I want to know more about," but I don't want to overburden people with my unsophisticated questions. I'm just getting started as a

gun owner. I have a derringer, a LMT, a 1911, a BSA.32, a TRP, and a "one of everything" collection that I would guess is around 10 guns. I figure I have the core of what I need to have a total in my arsenal. I like to hunt, and I'm going to start this year with dove and pheasant. I don't own a salt water gun, so dove hunting will be the only thing in a

season. I'm not very good at reloading brass, I'm rather new to it, and I'm looking for a good direction to go, from the 28 gr break-open sights, I was thinking I need to either go to a heavier or to a lighter barrel.
