Category: WindowsQ: WinForm application opens in single visual studio and dosent in multi visual studio environment I have one WinForm Application which runs fine when i run it in single visual studio environment. But if i open that same application multiple times by opening it in same vs environment it stops working. So, i am wondering is there any setting in vs which makes it force to work in single visual studio environment. A: On the Project > Properties > Build tab > Platform Target > Run and Debug, are you specifying a Target Platform? By default it's.NET 4 Client Profile. By looking at the documentation for the.NET 4 client profile, I don't see any performance issues. Q: how to update a row in mysql that changes another row's "field" OK, I am really new with MySQL. I have two tables (Table1 and Table2). Table1 has an associated id with each record. Table2 has a field: col1 with the corresponding id. For each record in Table1, I want to update Table2's col1 value so that it is the same as the value in Table1's id field. EXAMPLE:  
Table1: id col1 col2
