Pepsky Free CD Maker provides users with a complete solution to create high quality audio CDs. With this application, you are not limited to creating music CDs, as it enables you to create images and animations. Just select the template you want to use, then fill in the necessary information and click on the 'Burn' button. With it, you can create videos, images and animations, which you can then burn on a CD or a DVD. If you like, you can create the disc from scratch, choosing the template you want to use, the image or

---

video format you want to work with, then setting the size and the number of copies. Advanced users can make use of the 'Options' tab for customizing the default settings of the software. Creating a CD or DVD from scratch can be a big hassle if you do not know the necessary commands. Pepsky Free CD Maker makes it easier to do this, by presenting a simple interface where you only need to specify the image or video format you want to use and the CD/DVD size, then clicking on the 'Burn' button. The application is supported on various operating systems, and it can create either a CD or a DVD. To create a disc from

---

scratch, you have to set some parameters, such as the name and the size of the disc. According to the template you choose, you can select one of the images or videos you have already created, or you can load a new one. If you select an image, you can simply click on 'Add Image' and save the location to a new folder. If you select a video, you can specify the format, the video resolution, the creation date and the video size. You can also choose the image or video format you want to work with, either from the list or from the 'Options' tab. You can also specify the number of copies, the disc size, the volume or frequency

---

range, audio and subtitle track settings and the default disc ID, among many other settings. To create images or animations, you have to select the template, the image, video or animation you want to use and then fill in the size and the number of copies. Making use of the 'Options' tab, you can edit and customize the default settings of the software. To this end, you can specify the title, the text size, the font, the background color, the DVD/CD border color, the audio/subtitle track, the background and foreground colors

With Pepsky CD Maker, you can easily create and burn CDs. It gives you the opportunity to choose the CD's data source (audio, video and data files). You can then choose and arrange the files on your own, use the built-in player to preview and automatically decide the order in which you'll play the music and videos, and optimize the disks after they have been finished. The resulting CD can be saved to your computer. If you don't want to create a data CD, you can rip data from existing CDs or your audio and video files with the built-in audio and video players. Since it also has a built-in audio player, it's

---

also very suitable for creating audio CDs. Pepsky Free CD Maker's interface is easily accessible, even for novices. With a fast interface, the program is so easy to navigate that you can burn up to 500 songs in just a few clicks. And Pepsky Free CD Maker will allow you to change data CD's type, format and file structure. So you can easily create data CDs for data files, audio CDs for audio files, and so on. Bottom line If you're looking for an easy to use and powerful software application for creating data CDs, Pepsky Free CD Maker is definitely the way to go.
