An adventure game with an unusually high degree of comedic storytelling. It's also a new take on "Pokemon"-style games. If you like amusement games with a bit of interesting comedy and a romantic twist, you should play this game. Heya guys...now I'm going to talk a bit about my game The Order: 1886, which I've been working on since November. My little game stands for the new epic concept of the 19th century, when the birth of photography led to a renaissance of the novel in literature. My game is a 2D action adventure game set in a world of steampunk, which looks a lot like a cross between the '20th century', '19th century' and 'future' era. The setting is based on the style of Victoriana from the late 19th century. Central Europe is ruled by a 100%-Fascist monarchy and a large shadow government, standing behind the elite Police-Kompanie. The government controls the masses through propaganda and fear by police terror. The game is set during the long night which came at the end of WW1. The turn of the century was a black years for the Slavic people. More than one million people died in the spring and summer of WW1 between 1914 and 1915. In countries, where the National-Socialist Revolution was already implemented, many people were sacrificed on the altar of war. The armies of Germany and Austria-Hungary took an large number of Slavic people prisoners. Ethnically, this was not only about people from eastern Europe, but also the Russian people of South-Siberia. Here, we arrive at the game's villain, developed by me personally. The imperialists of the Warburg family are called the 'White Foxes' after the government's caricature. In reality, the Whites were the aristocratic families of Russia, who profited from the Napoleonic Wars and the revolutions of 1789-1815. In the 19th century, they established themselves in Russia as a stronghold of the old government, and the Emperor Nicholas I became their protector. The White Foxes used the Slavs as cheap labor while exploiting them with the help of the police. Their main factory was developing armaments, which were used in the Russian Revolution. After the 1914-15 war, the Russians decided to use the war-prisoners, the vast majority of them Slavs, for reparations. They were loaded
