[Pattern of tumor antigen expression in tumors of the breast]. The breast epithelium is made up of heterogeneous cells which have the potential for producing growth factors. Besides these, ductal epithelial cells represent the source of laminin, which appears to be involved in cell-to-cell binding during mammary gland development. The breast tumors express HLA class I antigens, which can interact with specific T cells and can be used to distinguish between benign and malignant lesions of the breast. A proportion of neoplastic breast lesions is positive for the CEA antigen, a glycoprotein also expressed on breast carcinomas. We have analyzed the molecular proflets of breast cancer. The tunnel was part of the Atlantic Wall, a series of anti-invasion structures built by Germany along the coasts of northern France, most of it at the end of the French Riviera, from May 1940 and prepared for a possible Allied invasion. History The Atlantic Wall consisted of thousands of concrete bunkers, anti-tank obstacles, minefields, coastal guns, and fortified bridges. It took huge amounts of manpower and equipment to build. As the Allied invasion of France gathered strength, the Atlantic Wall became ever more solid. The opening of the tunnel was a great propaganda victory. Here at one end was the famous "change of the guard" at the Berliner Reichssicherheitsdienst (Reich Security Service) "Operettenhaus" (Iterally, German National Theatre, but more commonly the Entertainment House). At the other end, it was the entrance to the "fortress" of Kriegsmarine (Marine) command. The
