1. Field of the Invention The
present invention relates to an apparatus for generating a stable
image of digital information, and more particularly, to a recorder for
recording audio signals. 2. Description of the Related Art Optical
recording and reproducing techniques are beginning to play an
important role as next-generation storage media for digital information
recording. Particularly, the optical recording and reproducing
techniques are widely used for magneto-optical (MO) disk drives, since
they have the capacity of storing a large amount of information in a
relatively small size. An MO disk drive includes a pickup, a driving unit
for moving the pickup, a recording and reproducing unit for recording
or reproducing data, a mechanism for compensating for a tilt of a disk,

and a controller for controlling the operation of the
