1. Determine which features are most useful for your particular needs. 2. Download a trial version of Photoshop that will work on a computer that you know will be used for the job. 3. Check out the Tutorial Zone, which contains many tutorials and articles on how to use Photoshop to accomplish specific tasks. ## Picasa Picasa is a free photo-editing program for Windows, Mac, and Linux available at www.google.com/picasa. Check the Mac and Linux sites for links to Picasa software. The Mac site also has helpful tutorials that you can use to learn how to edit images with Picasa. You can access the tutorials by selecting Help→Tutorials from the Picasa web page. After you have downloaded Picasa, register to become a member of the Picasa Web Albums, at which time you'll gain access to all the features in the program. ## Photoscape Photoscape is a free program for Windows available at www.photoscape.org. A great hobby tool for budding graphic designers and photographers, Photoscape allows you to retouch photos, edit them using frames, and print them. The program offers you several photo-editing effects: ## Shadows: A bitmap or a blend of several point or surface brushes ## Fills: Bitmap or a blend of several point or surface brushes ## Shadows/Highlights: Bitmap or a blend of several point or surface brushes ## Transitions: Bitmap or a blend of several point or surface brushes ## Frames: Full-color pixel-art frames ## Glows: A bitmap ## Combines: Several bitmaps ## Duotones: Two bitmaps, one darker than the other ## Hue: Your choice of color plus black and white ## Oil: (Also known as "Topaz" in Adobe Photoshop Lightroom.) Enables you to tint colors on the color wheel ## Pixlr Pixlr is a free photo-editing program for Windows, Mac, and Linux, available at www.pixlr.com. Pixlr offers the same features as Photoscape and Picasa (see the preceding section).

In this article, we'll walk through the basic tools in Photoshop Elements, including the commands that draw and edit images. We'll start by opening a file that has the logo for Ouray High School in it. We'll modify the drawing of the logo in the same file and save the file. Opening an Image for Editing You start Photoshop Elements on a new empty canvas. The name of the canvas will be the name you give the new file. When you save a file, you can choose to save it with a new name. When you open an existing file, you must give it a name. You can always close an image file to delete it, but your actions are saved in the file. You can also save a file with a new name, even if you have it open. Open a New File Open a New File window Click the File menu and select Open from the Edit menu. Photoshop Elements opens a window that has the Open dialog box and a list of folders in the upper right. In the left pane, it will show any existing files in the folder selected in the upper right. In the right pane, you can select any file in the list and see more detailed information about the image, including the size and type of the image. You can also drag a file from the desktop into the window. This is helpful if you have images you want to start with as a base and don't want to take the time to drag them into a folder. To open a file directly from the desktop, click the folder button at the top of the window, select your desktop, and click the file. You might want to start Photoshop Elements with the folder where you store most of your files in the lower left. Work with a selected image In this example, we have a saved file called OurayHS in My Photos. We want to open it and work with it. Drag the OurayHS file from the desktop into the file window. A preview of the image will appear in the lower right. To open Photoshop Elements, click the image in the preview pane. If you click and drag a file into the image window, Photoshop Elements will open and use the selected file. Photoshop Elements opens the image. The image is on a white canvas with the tools described on the following pages. Saving a New File This example shows how to save a 388ed7b0c7

Q: jquery div click only all? I'm trying to get the div tag clicked from one function to run only once. I'm using ID's with all the different div tags, is there a way to make it so I don't have to add ID's to all my different div tags? `$('#div#content1').on('click',function(event) { // Do something on click }); $('#div#content2').on('click',function(event) { // Do something on click }); $('#div#content3').on('click',function(event) { // Do something on click }); $('#div#content4').on('click',function(event) { // Do something on click });`; A: If you use CSS with a class instead of an ID, you can simply use: `$('.class').on('click', function () { });`; In this case, the code will use any element with that class when clicked. Q: How can I fix the array indices in this outer loop? I'm working on a list of two outermost loops and I'm trying to create an array of x and y values for the inner array. my list is of the form: `my_list = [[0.0, 2.0], [1.0, 2.0], [1.0, 3.0], [1.0, 2.0]]` I want to create a 3x3 array whose size is equal to the number of times each value appears in the list above, i.e. `[[0.0, 2.0, 1.0], [1.0, 2.0, 1.0], [1.0, 3.0, 1.0]]` My code so far is: `my_list = [[0.0, 2.0], [1.0, 2.0], [1.0, 3.0], [1.0, 2.0]]` `my_array = np.array(my_list)` `row = len(my_list[0])` `col = len(my_list[1])` `print my_array`

Casino War Casino War is the fifth and final studio album by American heavy metal band Pantera. It was released on June 25, 1993. Recorded at Empire Sound Studios in Burbank, CA, and mixed at Battery Studios in New York, NY, the album sees the group return to a more metal sound than the previous album. Frontman Phil Anselmo, guitarist Dimebag Darrell, and bassist Rex Brown were joined by the members of the Melvins and Tommy Lee (drums) and David Lee Roth (lead guitar) (formerly of Van Halen) for this album. A music video was filmed for the song "Walk", but the group subsequently went back into the studio to film a video for "I'm Not That Tough". The band disbanded in December 1994. Background The album's lineup is similar to the one on 1996's Condemned to Punishment, as Phil Anselmo, Rex Brown, and Dimebag Darrell all returned to the line-up from which they departed that album. The only departure from the lineup is that Rex Brown was replaced by the bassist's nephew, Brant Bjork, as a temporary fill-in. He remained in the band until Pantera's final concert on December 4, 1994. The album's cover features a photo taken of Dimebag Darrell on the set of the 1986 film Lethal Weapon, which was taken by Ernie Fossel, the same photographer who shot the cover of Thrashin. The original photo was taken by John Vetteese, brother-in-law to Dimebag Darrell.
