Hellbound combines hyper-kinetic gameplay and a dark and psychedelic atmosphere. The developer of 'Fatal Frame' has created a unique horror experience that drops players in a world of madness. The player is taken from the safety of a comfortable and familiar environment into a world full of violence, danger and evil. The player is caught up in the story of Hellbound- a ghost hunting adventure with a fast-paced, high impact gameplay, in which the player traverses the world in the role of Matt, a young ghost hunter, who gets caught up in some serious trouble. The gameplay requires the player to dodge, fight, and climb in order to escape deadly traps, or simply to find their next way out. Leading up to the start of the game, Matt got a mysterious message regarding an imminent disaster threatening the whole world. His mother has been kidnapped by murderous clones and is being held hostage in an abandoned pharmaceutical lab that is closing down. Matt has to find her, before it's too late. In her quest to get back to safety, Matt is accompanied by her ghostly loyal dog who lives as a spirit. Every single step he takes on earth leaves its imprint on his soul. The game is full of surprises, including deadly traps and challenging encounters. In the meantime, the player can experience the whole game in two different modes, including a classical 3-D fighting gameplay mode

---

or an audio walking gameplay mode, which forces the player to experience the audio and the visuals simultaneously. Videos: First of all, we would like to present you our very first gameplay trailer. We will shortly be releasing more trailer videos, including a developer diary and secrets. Q&A: 1. Can Hellbound be classified as a Survival Horror game? Hellbound is definitely a Survival Horror game. The goal of the game is to explore and survive in an evil world, filled with dangers and traps. While the player is never alone in Hellbound, the enemies will often surround and attack him, so survival becomes a challenge that the player has to master. Q&A: 2. What is Hellbound about? Hellbound is about the madness of the afterlife. The game is set in an evil world, and its inhabitants are all twisted, twisted creatures, who are either not human at all, or their human forms have gone mad and are now a nightmare. The game brings the player directly into the middle of it, where he has to face the enemies and discover the secrets of the mystery. Q&

This was my first zine for gameart.net, you can see more on my games page. Tyler wrote up and posted about how we used the Pixel-Style pack for his Time Fantasy Sprites in his In-depth Pack Analysis, and JF's sprites. So I decided to throw this into a collection of sprites to match pixel style and use the colors of the colors of the pack, my personal preference would be the DS-ISO pack or the Matriax pack. The pack is named 17thTh because I made everything in a hex editor and my own hex editor was on my seventeenth time editing the pack. "Th" stands for "time" because of the match with these sprites, but could also be read as standing for "the" in the same way the decimal system was named for the decimal point and for the Roman Numeral "M" The pack was developed with RPG Maker series, this means it was made to be in a very compressed format with colors being compressed into 128 or 1 byte colors. It can be used as a pack for almost any game, including adult-rated games. It was made with texture compression turned off, though I did test the tile limits of the programs I was using. You are welcome to install and use this pack if you think it fits your project, I'd be grateful if you shared it with me and the world. To install, simply unzip and install from the.rar folder, some programs may require a patch or may

---

need to decompress an archive. All programs should be in the RPG Maker Series folder on your game. There is a document included with instructions for using the pack in your program, though I am not responsible for any loss of data from using these packs. If you wish to return these packs for any reason, I do offer these packs for a fee. To make a return, you must ship me the filled-out return slip included with this pack so that I can process a refund. This is on top of the standard 15% fee for returns. Otherwise, enjoy. ----- Support PixelationInc on Patreon: c9d1549cdd

**Q: Connect HTML to C# via WebRequest I have some C# code that is running on my local machine via Visual Studio 2010. I've connected HTML to the C# code via WebRequest. The code sends messages to the HTML according to a predefined pattern. I want to make my C# and HTML communicate with each other, but I'm having some problems. The HTML file is in /Pics and the C# file is in/Classes. So here's what I'm trying to do in the C# file: WebRequest request = WebRequest.Create("/Pics/welcome.html"); request.Method = "POST"; byte[] data =**

```
Encoding.ASCII.GetBytes("Content-Length: 4\r"); request.ContentType = "application/x-www-form-urlencoded"; request.ContentLength = data.Length; request.RequestUri = new Uri(""); request.Timeout = 3000; request.ServicePoint.ConnectionLimit = 100; Stream requestStream = request.GetRequestStream(); requestStream.Write(data, 0, data.Length); requestStream.Close();
```

And this is the HTML file I'm trying to connect to the C# file:
