It will often ask you if you want to save the changes as a copy of the original image, an adjustment layer, or another format. The easiest way to go about retouching an image is to make a change using the regular Selection Brush tool, select your image, and make your adjustments. After making the changes, you can always use the Selection Brush tool again to undo your changes. After you have retouched your image, you can save it in the format it is in.
