## **What's new in Battle Riders:**

**Here's a neat little horror game that I'm playing now, and I hope you will! Here are some features: You spawn as the last survivor of a crashed science mission, the crew members who were left still frozen behind you for whatever reason are slowly unfreezing and re-discovering something from their past. Not quite sure what it is, but you're pretty sure you've seen or heard of something relating to a certain death cult - Legion of tooth. Partially because of past trauma, your subconscious begins to manifest the cover-up in a sort of lucid dream - meant to be a completely fictional thought, but all too real, thanks to the SciFi-Thing that's slowly crawling in on itself from your fallen comrades. It's not quite Jonestown by the way, but we can blame Reagan. As you wake from your nightmare, you're almost completely paralyzed, and as the voices in your head begin to jump around like wildebeests at the local watering hole, rage begins to overtake the girl behind the mask. "GET OUT OF MY MIND!!!!!!!" - Legion of tooth that's the current password. LOL You can only perceive parts of your internal world, as well as the world around you. You can also think in crazy ways, if that you would like to read more about that, just follow this link: [Nuts for brains](#) You're not alone in your madness I would love to have a similar-noise experience in**

**real life, I have an unusual ability to hear people, who are normally very well tuned into other matters - tapping a spoon to a silverware (ignore that last bit, it's a mental thing). As soon as they start calling someone's name, I know it's them. There's no fucking way that would be how normal people work! Also, helping me out. I'll get them. Why they're calling you for no apparent reason is another interesting thing I've tried my best to unearth. You must forget the difference between what others imagine as usual, and what reality is - It's all the same perception, and the attempt to ignore the voices in your head is just another way of projecting your uncertainties**
