AEG GAMES was formed in March 2009, joining the international games industry after acquiring World of Simcity developer SimCity Technologies (formally The People's Cube). Under the AEG banner, a suite of games based on and themed around cats have come to the PC with the release of Cat Lady - The Card Game, Cat Tricks, Neko Atsume and Kitty Galore!. Since then, the studio has become a leading force in the card games category with the release of several games including Frogatto, The Dice Game, Hi Muddy! and Dr. Jelly's Pocky Factory! AEG GAMES is a leading independent games publisher with over a decade of experience. So I decided to have a go at a Neocounteroid release and i've made one of them! Although it doesn't have a story like the others. I also had to work really hard on the naming. I'm going to do some more of these in the future with new takes on their characters. For example I'm working on a game called Witch Girl and Witch Boy, this time with a witch and a wizard as the protagonists and I'm going to use more popular music in the soundtrack. Here's one of the cards I made before the sale happened. I haven't given the backstory a chance yet though c9d1549cdd

What's new in FrankenStorm TD: Prologue:

Hollow Knight is a 3D platformer video game developed by Swiftwright Studios for the Nintendo Switch, PlayStation 4, Xbox One, Nintendo Switch Online, and PC. The game was released worldwide on June 28, 2018. It is the first indie game to be released exclusive to Nintendo's hybrid console.

Development of the game began in early 2017, and the game was released on the Switch console on June 28, 2018. The game received generally positive critical reception, with praise being placed on its art style, gameplay, sound design, and narrative. Hollow Knight received a wide range of awards and nominations, including winning awards at major video game conventions, including The Game Awards 2018, and being a runner-up for the National Academy of Video Game Trade Reviewers (NAVGTR) Sound Award. Gameplay The in-game title takes place within a 3D, near-3D world. Players control the protagonist Mina Hollow, an elf and the Knight Captain of the Moonless Knight who arrives at the Lake of Certainty to find a portal that will allow her to travel to the Chaos Garden in order to defeat the villainous Lord Loss. The gameplay largely involves exploration, platforming and combat. Players control Mina Hollow using the analog stick to move her across two dimensions. She can jump, swing, dash, and jump across ledges, and can grapple out of combat. The game is set in a map that allows the player to freely move between these areas, despite the limitations of its spherical environment, including a constrained movement range and obstacles blocking line of sight. The game employs a stamina system which limits the player's movement but allows Mina Hollow access to special moves and allows the player to acquire and combine weapons. Mina Hollow's weapon set consists of a variety of swords and other long weapons, which she can hold to attack her foes, and shurikens, which she can toss to travel through the world at a fast speed but can be grabbed and used to grapple past obstacles. Mina Hollow is equipped with six weapons, four of which can be held in one hand and two of which are thrown. She can equip one type of weapon to each hand, and the player can equip up to two abilities to one arm slot, as well as having a choice of four ammunition types. Weapon types include

swords, shuriken, special attacks such as a hammer for melee combat, fireballs, chains, and explosives such as the fire bomb, flamethrower, and crack
