Keep checking for the regular updates, movies and movie plays.Q: Where to get a random string that can be used for a cookie? I would like to generate a random number for a cookie that's shown on my webpage. There are random numbers that are between 0 and 255, but that's not what I want. I want a random string between the letters a and z (case sensitive). Is there a way to generate a random string with .NET? A: Try the UUID class. It uses a random value which is kind of "random" More information can be found here and here. This invention relates to integrated circuit (IC) random access memory (RAM) and, more particularly, to a non-volatile IC RAM, specifically of the type wherein read and write data access operations are effected by applying a combined voltage to specific select lines, e.g., word lines and bit lines of the memory device. In a conventional large capacity RAM, such as a cache RAM, an integrated circuit is utilized as a storage device. The storage device has specific data input/output ports, collectively referred to as I/O ports. Data can be written or read from the integrated circuit at any selected I/O port by a system controller or the
