You can see the trailer for the movie, and you can also see up-to-date information including the cast.Q: How do I set and access a Dictionary's value in a WPF MVVM? I want to have a Dictionary or other data type with key/value pairs in a WPF MVVM project. Basically, what I want to do is to be able to set values in the dictionary, then read and set those same values in the Dictionary via one of my ViewModels, for example: var myDictionary = new Dictionary(); myDictionary.Add("key1", "value1"); myDictionary.Add("key2", "value2"); var vm = new ViewModel(); vm.MyDictionary.Add("key1", "a new value"); myDictionary["key1"] = vm.MyDictionary["key1"].ToString(); What I have so c6a93da74d
