I load a file and then `rgl::plot3d(res)` and everything is fine. However I noticed that I am unable to rotate (or zoom) the 3D image. I am using Windows 7 and have an Intel Core i5 CPU. A: I found a solution for this by myself. I needed to install ggplot2 package, which also includes rgl package. I load a file as described in the rgl documentation and plot it with ggplot2 and at the end of the `plot()` function `rgl::opts_3d()` is used. The result is a 3D plot with zoom, rotate, and show full 3D plot. `library(ggplot2) library(rgl) ... ggplot(mydata, aes(x, y, z)) + geom_point() ... ggplot(mydata, aes(x, y, z)) + geom_point() + rgl::opts_3d()` A woman who came in contact with a man who died of Ebola has been placed under quarantine, hospital officials say.
