I'm trying to run a compare between two files and I am getting lots of following errors. It seems the files that I am comparing are too large and it fails because it cannot allocate enough memory: "Allocate heap memory failed: Try increasing block size to at least 16M" Any ideas? A: You need to find a version of this software that was tested on a file that is not too large. You can go to the 'About' tab in 'Edit', and then 'Details' to see if there is a default size of the block size that it will let you allocate. A smaller default might just be the problem. Also, look for another software that does what you want, and then compare its basic install to the one you have now, to get an idea of what they do and how they work. What didn't make the news • Junior Lake made his Cubs debut and went 1-for-2 with two strikeouts in the Cubs' 8-6 loss to the Astros. • Tom Gorzelanny will throw a simulated game at Wrigley Field on Friday. Gorzelanny was activated from the disabled list on Tuesday after he reinjured his right shoulder. The Cubs are planning to bring him back slowly. Gorzelanny will throw 30 pitches in a simulated game on Friday and will be on a similar schedule next week. • The Cubs will not use a tie-breaking playoff game (victory by mercy rule or 11-inning tie) in the playoffs. • The Cubs will meet The White Sox again in the postseason for the third time in five years. The Cubs won the first two games of the 2008 and 2010 series. • Matt Garza said he is 100 percent after experiencing some tightness in his groin and hamstrings. Garza also said he hadn't been able to sleep well because of the pain. Garza said the pain has been there for days. c6a93da74d
