I tried to load it on my iOS device, and it didn't seem to load at all. I also tried to find it in both the gnss download folder and in my app file, but found nothing. How can I load it into my app? I also tried copying it to / Users / {username} / Applications / GnSS / and changing it to "c3640-jk9s-mz.124-16.bin" but nothing happened. I have a few questions: How do I find it in my applications? How do I get it to install?
