

## Download

No error message appeared. I pressed play and the game kept loading only showing the loading screen. I can play the game offline. After about 30 seconds, I tried to play the game online. And get the error message as below: "The Ubisoft service is currently unavailable" "The Ubisoft service is currently unavailable" Any ideas or suggestions on this problem will be appreciated. Thanks in advance. Another last minute Assassins Creed 4 fix. The game no longer crashes after playing for about an hour and a half with the occasional framerate drop. I think this is a silver lining in a very bad storm. So what did I do? I had a look at what Ubisoft had changed on their Steam & Uplay servers. I ran my Steam client & set up a new Ubisoft account (needed to log in using my new account). I then used my Ubisoft Connect account to log into Steam and did a clean install of Black Flag. The game installed without error, and I was able to play for a good hour or so. Hi, I'm having an issue on my Macbook Pro running Lion. I have been trying to install Assassin's Creed 4: Black Flag since it was released but I've been getting an error every time I try to run the game on my mac. The error is "The Ubisoft server was unable to be found. Please try again later" and it says the failed session was Unable to load game content." I have reinstalled my game in the past and deleted the game files just to try and get it to work. Help! Please! I need help. I tried to install Assassin's Creed 4: Black Flag through my Uplay and when it installed it was successful but when I started the game it says that my PC is unable to connect to the server (Error). After 1-2 hours it's still saying the same thing. How do I fix this?

### Assassins Creed 4 Fleet Offline 366

players can only access the treasure map chest if they have the required treasure map. once players have the treasure map, they can go to the treasure map chest and use the first button on the treasure map to have a locked chest open. the treasure map also allows players to share the chest with others in their fleet or to see the progress of other players in the chest. i don't want to play with my friends, and have no interest in playing the online multiplayer. why are they all online now? the only thing i want to do is enjoy the caribbean setting, and to keep exploring as i did with assassins creed brotherhood. hello guys, i've been having the same issue as @mr\_law\_9019 and @ilzeililz. i've tried several times to join a fleet, and the server keeps saying "the server has been offline for too long". i'm using a ps4. the problem for me is the online servers are not working. i've tried to connect to both pirate and assassin fleets and every time i get a message saying that the server is offline. i've already contacted ubisoft about this and they said it was a server issue, but now i can't connect to the game. this app sucks and i'm gonna say it again. i have kenways fleet on my phone, i started playing it one day and it says i have offline mode, but when i open kenways fleet, the game is not playing online. i play a lot of kenways fleet, and i've bought all his skins. i have a black flag and i play on my phone, and the kenways fleet is offline. i contacted ubi support and they said that they fixed a bug on pc version of the game. if you have the same problem, contact support. i don't want to spend 20 dollars on a skin when i can't play online on kenways fleet. 5ec8ef588b
