## Business Driven Technology 3rd - Baltzan, Haag, Phillips.pdf

connect's rigorous academic program is a combination of accessible textbooks with expertly written and supported content, and adaptive learning solutions that help students master the skills needed to succeed. in this chapter, we will describe the system approach to problem solving, explain the steps of the systems development life cycle, point out the need for successful project management, change management and risk management, and compare different development approaches organisations can apply. we have years of experience in developing accessible online learning solutions for students with disabilities. whether you require training for a new position, preparing for a career change, or just to enhance your career, connect is the first choice for learning. using connect's complete adaptive learning technology, we are able to deliver content that is perfectly tailored to individual needs. our adaptive learning technology helps students master skills and concepts by adjusting to each individual's needs, without sacrificing the integrity of the content. connect is at the forefront of educational technology, delivering market-leading results for our clients. whether your organisation is looking for a competitive edge, preparing for a career change, or developing its next generation of leaders, connect is the right choice for you. we are proud to be the most trusted provider of online learning solutions. we go beyond the typical textbook to provide a far more effective, innovative, and engaging solution to the most common business problems faced by today's business students. smartbook 2.0 is a content-oriented, adaptive, mobile-enabled, web-based learning environment designed to be individualized and engaging. it is built on an open book model that provides a new level of flexibility to meet the needs of today's business students.0 contains a number of new features, including a content map, content library, and readanywhere. the content map allows you to filter and search content for topics within any topic to better discover the topics you need to know. this is similar to the role of the 'magnifying glass' in a traditional textbook. the content library is a searchable repository of content that can be accessed by any student. readanywhere lets students read and complete their smartbook 2.0 assignments at any location. you can even assign and grade assignments using the readanywhere app, which is available on all major mobile platforms, making it easy to access your content from anywhere, at any time. 5ec8ef588b
