
PATCHED Connectify. Hotspot.Dispatch.PR 0.7.3.3.30440.Cracke d.Tested ((TOP))

[Download](#)

bpo-64195 : Hotspot was always initializing a new memo cache file at the end of each run with a time.sleep call. The timing in the patch prevents the memo cache file from getting bloated with unnecessary data. Try testing without the patch (may be slower). bpo-47299 : Always call session.reload() at the end of Dispatch.__del__ to clear any old_session state/memo cache. Patch by Sergey Fedoseev and Erlend E. Aasland. bpo-45122 : Reset the old_port member of any new AccessServer created in the Connectify subclass to what it was before the AccessServer was created. As a result, the AccessServer instance's

old_port changed. When this patch is applied, the old_port is restored. This is especially relevant when new AccessServers are later added to the Session.
