

Registration Key Proshow Producer 503297 !EXCLUSIVE!

hello, i am having the same issue as the previous post. i was using producer 7. i upgraded to producer 8. now producer 8 does not recognize my registration key. i was told to upgrade to producer 9, but there is a message that says that producer 9 has been discontinued. i was told to upgrade to producer 10. i was unable to download producer 10. i was unable to get help from proshow support. proshow support says that they do not sell producer 10. hello, thank you for your reply. i am a novice with final cut pro and not familiar with the ins and outs of fcp. you were very helpful in your reply. i have not used producer 9. i would have to go to proshow.com to download producer 10. i will download producer 9. i will see what happens. i had a similar experience like the one you mention. it turns out that the product keys you have purchased through photodex no longer work with the current version of proshow producer. we have not heard anything about a change in that area. we continue to see users with the same problem. we did some research and found that the company that owns the website that you mentioned that allows you to activate the product in no longer exists and their website is down. we have been in contact with them but have not heard back from them. thanks for the help. i'm trying to get proshow to work on my new macbook pro. it worked great on my old macbook pro. i'm using mojave 10.14.5. i followed the instructions to install the latest version of proshow and the program opens without any problems. i have some photos from my old macbook pro that i want to view. i'm trying to use the profile that i created on my old macbook pro to open the photos. i get the message: "proshow producer 503297 has encountered an error. it is not compatible with the current version of mac os. please contact support to find out more about how to solve this issue." does anyone know how to fix this? many thanks

Registration Key Proshow Producer 503297
