It has five modes: Amp, Pedal, FX Loop 1/2, FX Loop off/fx 1, FX Loop off/fx 2. The Amp mode is as usual, the Pedal mode is for when you use your amp's footswitch to turn the amp on and off. The FX Loop modes switch between either using the pedal or not using the pedal. The 1/2 switch serves to half the amp output level when using the pedal. The off and FX modes do not use any pedal switch at all and just switch the amp output volume to half or zero. This doesn't affect the sound you're hearing from your amp which remains exactly as it was at full volume. Note that this feature works only if you have the Audio 2/MIDI output selected from within Kontakt as the instrument output. If you are using the MIDI output, you cannot use this feature.
