the software combines a three-dimensional user interface and the exact machine data of the load moment limitation from the liccon crane control system. the data displayed in crane planner 2.0 are determined using exactly the same calculation logic as the live data generated by the real mobile and crawler cranes. key data such as ground pressures, support pressures, lifting capacities and centres of gravity are calculated simultaneously. each time the configuration, load or geometry is

changed, a new calculation is carried out. the program can be downloaded and installed to a pc from the crane plannerhome page. a free licence for the free version, or the fee-based pro version can be obtained from the licence shop. furthermore, there is a trial version available which enables users to enjoy a 30-day free trial of the pro version. whilst using crane planner2.0, the calculations of the machine planning data, such as lifting capacities, support and ground pressures, are carried out online to ensure that they are always up to date. when working with the electromagnetic field, use caution. the field is extremely powerful and very easy to get caught in. remember, it can make you invisible, force you to pass through solid objects, and so on. be aware of the main dangers of the field, and use it only for what youre supposed to be doing. if you use it for a purpose other than what it was designed for, you may have some unwanted side-effects. the electromagnetic field is extremely dangerous, and you must be careful if you use it, or else you might get hurt or even killed. 5ec8ef588b
