
Assetto Corsa Traffic Mod !!EXCLUSIVE!!

Download

This mod adds a new camera mode to Assetto Corsa that's sure to blow you away. This mode allows you to drive in the style of a professional drift driver, allowing you to effortlessly slide around corners and perform a number of cool tricks. It's a lot more like playing a racing game, but requires a whole lot more skill and dexterity from the player. The camera can be switched on any map, making it great for drifting on an intermediate setting or for beginners who want to learn and take it up to the next level. You can even swap between the left and right views to familiarise yourself with the feel of the car. Traffic Tour is a nifty little addition to the base game, though its not groundbreaking stuff. In the future, the maps will probably add more interesting features such as new scenery such as forests and mountains and even other drivers. Once you've dealt with the initial setup, you'll be set up to get a feel for the controls in Traffic Tour. The controls are fairly simple and the physics feel authentic with bends and other features such as brush or curb interaction bringing an element of realism to the simulation. All of the cars feature decent handling, and the driving feels responsive. You can even choose from a number of different cars; from the base Mustang to the street legal Jaguar and across to the radical Aston Martin Vanquish. There are different levels of traffic present on the road and once you have the basics under your belt and feel good about your handling and reaction speeds, you can take control of the apex and try your hand at some drifting. Although there is an offline practice mode where you can experiment with different speeds and calibrate different settings to your liking. You are also able to zoom in for a closer view of the lanes you need to take in order to navigate and drift your way around the tracks.

Assetto Corsa Traffic Mod

Interested in this hot game? Try this version, there are no signs of any bugs reported. If you are using a PS3 or Xbox 360, then this is a true racing simulator. In a way, its a little bit like motorcross, but without the dirt. For your engine has to be powerful to deal with the traffic that youll end up having in the top levels of this game. If you have PC versions of the game, then you can also play this on it. The songs in this game are also very beautifully rendered. The physics and the added layers of reality work amazingly in order to give you an experience that is almost a virtual reality. The fact that there is a lot of traffic and that you can get even more of it with the new engine really, really enhances the experience. Youll be racing other racers, putting them to an end and earning a win, or youll be going head-to-head for a podium place, or showing off your skills in Extreme mode. Whenever you try this game, youll be coming back for more. Traffic Rider is a must-have game, itll make you want to race in the real world. So, yeah, if you want to go through the city like a real street racer, then youll be in for a big treat with Assetto Corsa. Choose your motorcycle, choose the gearbox and type of racing, choose between a full-throttle and a drifting style and the race begins. You can speed off on a circuit course or you can do an adventure course. Advanced Tracks 2 is a game which takes you on an epic racing journey and offers a unique variety of tracks, from the simple and easy track to the tricky and difficult. You can choose from fifteen different cars and four different classes, such as the four-wheeler quadracars, the sport cars and street buggies. As you race through the streets of various cities, you are subjected to different difficulties in speed, traffic, and other obstacles. If you really want to have fun and experience the thrill of driving, this is the game for you! 5ec8ef588b
