ListaQ: Extracting html string from clipboard, and copy it I want to extract text from the clipboard (using WinAPI), and copy it into a new document. With "text" I mean just a string, not html. How can I get the CString from the clipboard, then copy it? A: When you copy text to the clipboard (Ctrl+C or Cmd+C), Windows has the text in MSWord format. And that means that what you're copying to the clipboard is a CString where the first N bytes are the header (the length of the text) and the rest of the memory is the text. So you can get the text from the clipboard by just calling GetClipboardData and getting the MSWord format. Autocue KP Capital Bank Plc is a Ghanaian bank based in Accra.
