## Hirens Boot Cd 10.1 Iso Free BETTER Download 56

hello. i have a problem with hardware, i have a wd 500 gb and one day did not want to enter in windows i tried a friend, nothing, i've tried hd tune, and it gives me an error message something like reaf error! test aborted now i tried with hdd regenerator there when i started scanning beginning to grow bad sites consecutively with sectors ago i tried to rewrite manster boot recorder but just gives me error well understood i tried windows in disk management, windows tells me hdd is type-logycal and file system-bad disk. so that's why i do not understand why i say windows software that is empty, simply shows me he has nothing on hdd and i before that i 3 sectors now i have none, nor mil sees that partition, just i like it simple..and no longer a problem i 2 im pc hdds have another one of 80 gb, and when you 80 gb bag on that one in the pc is ok, but when you bag and may gb 500 ala the situation begins to hinder,, penetrates the windows and as i give to install windows again go hard in boot.acum forward opinions. please if you can help me cunva. i have a geforce 6200 and i have done everything to it but still there is no video after it boots up like there is no video card, check your dvi connector. also make sure the bios settings set your video card as the primary, no settings should have to do with the pc. if your videos are you using the correct cables, make sure the cables are plugged into the correct ports on the video card. load up the cd contents into a folder by right clicking on the iso file and selecting burn image. in the event, a power failure happens with a burner with windows, you simply run the burn image again. your burner should be unable to erase a dvd before finishing. burn image step also works with cd/dvd images you have made with windows.

all these features contribute to a quick and easy system recovery. it offers a simple interface that enables you to repair the entire system and set the system back to the original state.the program consists of several useful tools. some of these tools are;

- mbr repair

---

of all i want to congratulate you and the whole team for the work you do for us. from you i learned to see differently the it world. i have the following problem: for a while my pc works very hard in the sense that if it runs more than 2 applications at the same time the pc works very hard, for example if i listen to music and download something the music sounds jerky and responds hard to commands the pc. i have a pentium 4, 1.5gb ram. i tested

---

the pc with hirens bootcd and it did not detect any problem.

i want to ask you if the problem i have is due to the hdd to be changed or the processor, i mention that i download a lot on the net and i thought that the hdd was worn out or the processor. when you have time and you want to answer me, i'm waiting for you. 5ec8ef588b
