xyz is a polar graphing calculator application for your pc running windows. with xyz you can graph complex polar equations including polar asymptotes, polar loop, and polar asymptotes in polar coordinates. simple polar equations can be graphed to display radial distance vs. polar angle or radial velocity vs. polar angle. xyz supports nearly all the commonly used mathematical functions including trigonometric functions, inverse trigonometric functions, hyperbolic functions, logarithms, and rounding and absolute value functions. the xyz program comes with a built in help function that allows you to view quick animations demonstrating how to plot complex polar equations and to calculate quickly your values of interest. an additional tutorial video is also included. seamlessly display and play multimedia files including animations, mpeg-1, mpeg-2 and mpeg-4 videos, mpeg audio, jpeg, gif, tiff, bmp, ea, avi, wmv and swf. play and manage multiple video files, including fragments and multiple sub-files. install and play broken files in windows. support for various types of video container: h.264, wmv, flv, rm, rrmvb, vp6, vp5, vp4, vp8, mov, 3gp, 4gp, m4v, asf. the application can also record from the screen or from a camera. the original soundtrack and graphics can be saved for playback at any time. the application allows you to play, browse and manage multimedia files. polar.net is an instant messaging (im) and discussion software package that is preconfigured to use various im protocols, including msn, yahoo!, irc, icq, gaim, and aim, using rfc 1459 as the underlying protocol. polar.net supports subscriptions to newsgroups, being available for most of the popular newsgroups. groups and news items can be discussed in messages, and made public to subscribers and external users through the preferences menu. the preferences menu allows the user to tailor the application, configuring it with the im clients that they want it to use. chats with groups and other individuals, and group messages are conducted through their chosen im clients. a variety of online and offline contact methods are supported, such as email, im and instant messaging.
