Add any number of rows and columns to any KeePass database for easy organization. Any group, any cell, any size. Easy-to-use and intuitive! KeyCombine Description: KeyCombine is the first safe secure virtual keyboard. It's not a secret or password keeper - you don't want any computer to access your keyboard. And it's not a spy, it just monitors your typing activity. It looks like any other keyboard for that reason. It looks like any other keyboard. It just looks like any other keyboard. KeyCombine has one feature only - it "combines" all of your online, local and 3rd party keyboards. With a simple touch. The result is one keyboard for all. You can put any number of keyboards and use KeyCombine to easily swap between them. And every time you press "P" your keyboard appears on the screen, it could be a new keyboard, different with your current one. And just that, no passwords to type, no other components to think about. You just press your "P" and switch keyboards. You press the "P" and use a new keyboard. KeyCombine is the only keyboard management utility that does not spy on you, it just presents you a keyboard. KeyCombine is a smart keyboard for managing all your online, local and 3rd party keyboards. KeyCombine - Keyboard Combination is a keyboard management tool designed to make your life easier. It helps you to manage your "set of keyboards" for almost any situation. All you need to do is to choose the keyboards and pick up the one that suits your needs best. KeyCombine uses the same mechanism that standard keyboards do, it just lets you pick up the right one for your task. You use it like a standard keyboard: to type the letters. How Does it Work? KeyCombine is basically a keyboard with a key combination that lets you choose any keyboard at any time. So, after every task, you can choose a specific keyboard that suits your needs best. You can use the keyboard itself (hotkeys are also supported) or you can set any software as a keyboard. You can use any virtual keyboard that was made for Windows, any custom keyboard, any built
