What's New In?

MetaProducts Inquiry is a universal HTML browser with features designed to save any web page you wish to keep as a link or archive. The program allows you to get the most of the latest web content and content optimization tools, as well as create custom page building blocks that provide the options you need. These options include customizable RSS feed viewers and Google search bars, which allows you to directly connect a web page to an RSS feed. It's possible to optimize pages for

search engines, save pages to the browser, as well as edit page properties. The program includes built-in page viewer, page thumbnails, frames, page search and related pages, as well as a built-in search engine. There are also five page builder tools, a page inspector, and a scheduler. Moreover, the tool is fast, intuitive and easy to use.
