

Sauvik. . At my work I need to maintain order in a form for a long time. You can view the log here [webform upload blank after form submission](#) This issue is caused by a power failure, which overwrites the file. And the application was working all fine before the power failure. A: You can also use method for validation with `allow_blank false` `$("#form").submit(function(e){ e.preventDefault(); //your validation here //if you want to use the default form submit action //just omit e.preventDefault() and e.preventDefault() in submit function })` Q: Get total count of complex conditions in Mysql I need a query which returns total count of following conditions of a table in sql. I have a table Accounts id_account | email | first_name | last_name |... -----
- 1 | email1 | name1 | name1 |... 2 | email2 | name2 | name2 |... Users id_user | email | role | status ----
----- 1 | email1 | 1 | 1 2 | email2 | 1 | 1 3 | email3 | 2 | 1 4 | email4 | 2 | 1 5 | email5 |
3 | 1 DeletedUser id_user | deleted_date ----- 1 | 2019-02-02 00:00:00 2 | 2019-02-03
00:00:00 3 | 2019-02-02 00:00:00 4 | 2019-02-
