Today creators have a very high bar for online collaboration. They expect and demand to be able to go into the company of their peers and collaborate with them online, using the latest technology, the most up-to-date tools and the best user interfaces. They want to be able to simulate the real experience of a live workflow tied together as quickly as possible. The company adds more Adobe Value Packs to its Creative Cloud portfolio, including Muse for music creation, Lightroom for image editing and SketchFlow for collaborative design. But it's just a start. Adobe Creative Solutions Cloud is designed to transform the way all artistic endeavors are completed, and this new “pack” of tools will further empower customers to complete their creative process. Designers, artists and other creative pros have already seen the impact of Adobe Creative Cloud on their workflows. Adobe is ramping up its subscription plans for a slew of technologies, including the expected dust-up over revenue from subscription fees and the recent addition of cloud-based Creative Cloud to its subscription lineup. With the consolidation of Creative Cloud into its subscription package for a monthly fee, Adobe professionals can buy licenses for tools from the Creative Suite and Creative Cloud and also any add-on software. In the new lineup, priciest annual options include Adobe Muse CC, a web design platform, and Adobe Story CC, an interactive narrative and dialogue design tool. There's a battle brewing between the pros who will use Adobe's subscription-only Creative Cloud and those who have been using the premium CS kit for a little while now. Those who buy Creative Cloud move up to the most expensive version of Photoshop (currently at \$11,800 for full CS6) and get all the associated apps, delivered via a monthly fee. Once you move to Creative Cloud, the software continues to be accessible via the desktop, but you typically must purchase a new tool every time you switch over if you want to work across all platforms. The subscription option is aimed at getting people locked into Creative Cloud for the long haul.
